Methodology

Patrick E. Gonzales graduated from the University of Baltimore in 1981 with a degree in political science. He began his career as an analyst with *Mason-Dixon Opinion Research* and is the former president of *Mason-Dixon Campaign Polling*.

Mr. Gonzales has polled and analyzed hundreds of elections in Maryland since the mid 1980's. Additionally, he and his associates have conducted numerous market research projects and crafted message development programs for businesses and organizations throughout the state.

Laslo V. Boyd is a partner of *Gonzales Research & Marketing Strategies*. Dr. Boyd received his Ph.D. from the University of Pennsylvania and has over 30 years of experience in higher education, government, and public policy.

Hilary Duff Gonzales is Director of Sales and Marketing for *Gonzales Research & Marketing Strategies*. Mrs. Gonzales has over 20 years experience promoting the state of Maryland, particularly in the tour and travel industry.

This survey was conducted by *Gonzales Research & Marketing Strategies* from October 1st through October 14th, 2013. A total of 819 registered voters in Maryland who indicated they were likely to vote in the 2014 general election were interviewed by telephone. A cross-section of interviews was conducted in each jurisdiction within the state to reflect general election voting patterns.

The margin of error (MOE), according to customary statistical standards, is no more than plus or minus 3.5 percentage points. There is a 95 percent probability that the "true" figures would fall within this range if the entire survey universe were sampled. The margin for error is higher for any demographic subgroup, such as gender or race.

This survey also includes an oversampling of 403 registered Democrats who indicated they were likely to vote in the June 2014 primary election. A cross-section of interviews was conducted in each jurisdiction within the state to reflect Democratic primary election voting patterns. The margin of error on this group is plus or minus 5 percentage points.
